

PCMH6ElementAFactor1- At least annually, the practice measures or receives data on atleast two immunization measures.

1) Immunization Rates for 11 year olds

Report Range: Jan 1st-March 31st, 2015:

Of 25 eleven year olds seen for physicals at our office,
21/25 received all 3 required vaccines of Gardasil, adacel, menactra= 84%
24/25 = 96% adacel
24/25 = 96% menactra

(Maryland state average is 50% gardasil, 75% adacel & 75% menactra)

*Of the 4 who did not receive gardasil, all were male patients who had documented refusals for the vaccine.

Please note by the time of this report our practice had seen 198/364 or 54% of all of our eligible 11 year olds from 3/1/14 to 4/15/15.

2) Menactra Booster Immunization Rates for 16 year olds

Report Range: Jan 1st-March 31st, 2015:

15/22 (68%) received meningitis booster

(48% of all 220 of our 16 year old patients were seen by this point in our office from 3/1/14 to 4/15/15)
